

24 Precipitants for Screening by Capillary Counterdiffusion

FOR PROTEIN CRYSTALLIZATION

Our screening kit specially designed for capillary counterdiffusion with [GCB-Domino](#) .

Triana Screen contains 24 unique reagents, 5 ml each the most succesful 24 conditions for crystallizations screening, is based on the formulation first described by M.S. Kimber etal, Proteins: Structure, Function and Genetics 51:562-568 (2003).

Triana Science & Technology offers this package of 24 precipitants:
