

Capillaries

FOR CRYSTALLIZATION

These capillaries are extremely thin walled. The internal diameter for these capillaries is of 0.1, 0.2, 0.3, 0.5 and 0.7 millimeters. These capillaries have a very thin wall thickness and is available in four different lengths of 30, 40,50 and 100 millimeters. These capillaries are specially cutted to use with the Granada Crystallization Box, but they also can be used with many other different products. Capillaries are made of Borosilicate glass.

Triana Science & Technology offers this product in packages of 25 capillaries.
